

COURSE OBJECTIVES

Segio Zyman, ex-Chief Marketing Officer of Coca-Cola Company defines marketing as “Selling more stuff to more people more often for more money more efficiently”.

Contrary to what most people think, Marketing is an investment, not an expense. In this practical marketing course, you will learn marketing strategies and plans adopted by leading local and international companies. You will gain insights into how marketing decisions were made and most importantly, how these decisions played a pivotal role in the growth of these companies.

You will acquire in depth knowledge on how to develop positioning statements, segment the target markets and develop an integrated marketing campaign (IMC) to drive sales and build market share.

This course will cover both the case method and real practice.

The case method is intended to structure your strategic marketing thinking when evaluating marketing campaigns. You will be required to produce individual work on assigned cases or topics, summarizing issues and points brought up during class discussions.

The highlight of this course is the company sponsored project. Students will be required to work as a team to research on the industry, competition and brand. Based on the gaps and opportunities identified, and ensuring that proposed strategies are in line with brand positioning and brand values, you will develop an IMC for the brand. Finally, you will be pitching your presentation to management teams of the sponsored company.

The course will serve as a good introduction to those interested to join the marketing profession or those who are keen to find out how marketing is the driving force for the growth and survival of many world class companies.

Academic Honesty & Plagiarism

Academic integrity and honesty is essential for the pursuit and acquisition of knowledge. The University and School expect every student to uphold academic integrity & honesty at all times. Academic dishonesty is any misrepresentation with the intent to deceive, or failure to acknowledge the source, or falsification of information, or inaccuracy of statements, or cheating at examinations/tests, or inappropriate use of resources.

Plagiarism is 'the practice of taking someone else's work or ideas and passing them off as one's own' (The New Oxford Dictionary of English). The University and School will not condone plagiarism. Students should adopt this rule - You have the obligation to make clear to the assessor which is your own work, and which is the work of others. Otherwise, your assessor is entitled to assume that everything being presented for assessment is being presented as entirely your own work. This is a minimum standard. **In case of any doubts, you should consult your instructor.**
