

NUS Business School

FIN2004 Finance

Semester II 2015/2016

COURSE DESCRIPTION

This course provides students with the foundations to understand the key concepts and tools used in Finance. It offers a broad overview of the financial environment under which firms operate and equips students with the conceptual and analytical skills necessary to make sound financial decisions for the firm.

COURSE MATERIALS

S.A. Ross, R.W. Westerfield, B.D. Jordan, J. Lim and R. Tan (2015), **Fundamentals of Corporate Finance**, 2nd Edition, McGraw-Hill Education. A financial calculator is also necessary – Texas Instruments BAII Plus Financial Calculator.

PREREQUISITE

ACC1002/ACC1002X Financial Accounting. As well, it is preferred that students have taken the equivalent of BZ1008 Statistics.

ASSESSMENT METHODS

Class Participation - 30%

Mid-Term - 20%

Final Examination - 40%

Group Project - 10%

- ***Class Participation***: Your class participation will form a major part of your final mark. Class participation will be regularly graded by your instructor throughout the semester. Note that although you will receive informal feedback about your participation throughout the course, all students are encouraged to seek more formal feedback at set stated occasions during the semester. The purpose behind such a high allocation to class participation is to encourage students to articulate their thoughts, be they in the form of questions or comments. The business school understands that both knowledge and the ability to communicate that knowledge are necessary complements to success. This

course will provide students with the opportunity to develop both skills. Class participation marks will be *normalized across all FIN2004 sections*, such that each section maintains the same average participation mark.

- ***Mid-Term and Final:*** You will be allowed to bring up to two calculators as well as **TWO A4 size sheets of paper** (with any notes/formulas you wish to write, on the front and back of those two A4 size sheets) to the exams. **NO TEXT BOOK OR OTHER NOTES WILL BE ALLOWED.**
- ***Group Project:*** You will complete a final course project in a group context. Details regarding the course project will be provided by your instructor at the beginning of the semester. Group project marks will be normalized across all FIN2004 sections, such that each section maintains the same average group project mark.

ACADEMIC HONESTY & PLAGIARISM

Academic integrity and honesty is essential for the pursuit and acquisition of knowledge. The University and School expect every student to uphold academic integrity & honesty at all times. Academic dishonesty is any misrepresentation with the intent to deceive, or failure to acknowledge the source, or falsification of information, or inaccuracy of statements, or cheating at examinations/tests, or inappropriate use of resources.

Plagiarism is 'the practice of taking someone else's work or ideas and passing them off as one's own' (The New Oxford Dictionary of English). The University and School will not condone plagiarism. Students should adopt this rule - You have the obligation to make clear to the assessor which is your own work, and which is the work of others. Otherwise, your assessor is entitled to assume that everything being presented for assessment is being presented as entirely your own work. This is a minimum standard. In case of any doubts, you should consult your instructor.
